

Pronunciation, iOS 14

Introduction

When using the speak screen or speak selection function on an iPad, sometimes the word that is read back to the user may not be pronounced correctly. On an iPad, you can modify the pronunciation of a word.

Learning Objectives

Completion of this tutorial will give you experience with the following:

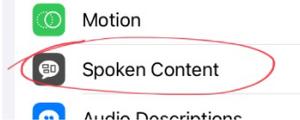

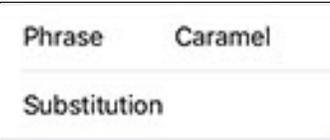

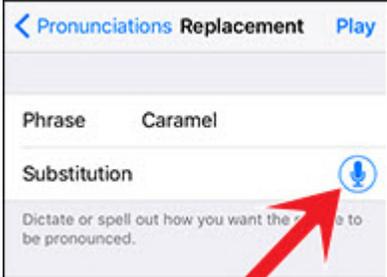

- Change the pronunciation of a particular word.

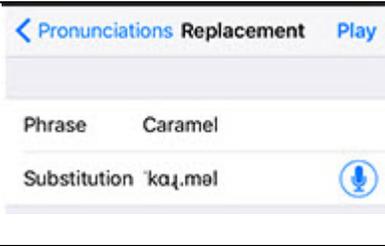

This tutorial assumes

- that you have an iOS device with version 14 software.
- You are connected to the internet.
- You know which word you want to modify.

Case Study

John's class is learning about the different First Nations Group in Canada. He uses an iPad to do research and often uses the built-in speak screen function to have the website read back to him. He often notices that certain words are not pronounced correctly, and he would like to have it corrected.

Modifying the Pronunciation of a word		
1	Go to Settings	
2	Go to Accessibility
