

Per-App Settings, iOS 15

Case Study:

Jane has a visual impairment and has a school iPad that she shares with her classmates. There is an app that she often uses. Using Per-App Settings, she can customize display and text size settings – e.g. bold or enlarge text, increase contrast, invert colours, add colour filters, etc. – for only the app she wants.

This tutorial assumes that:

- you have an iOS device with version 15 software.
- you have an app in mind on your iOS device that you want to customize.

How to Use Per-App Settings

1	Go to Settings > Accessibility.				
			Settings	Acc	essibility
				PHYSICAL AND MOTOR	
			cations	Touch	>
		Sound	15	Switch Control	Off >
		Focus	e Time	Voice Control	017 >
